FEEDBACK ON PROJECT MANAGEMENT
C.B. GAYATHRI  PCE  FINAL YR (IT)

The project management program was conducted by Mr. Kannan Narshiman and Mr. Vincy Joseph. First of all I want to say thanks to both of them and I thank our placement sir to give this opportunity for our student.

By this we gathered many information about project which were given in a company and Mr. Kannan taught nicely with a real life example. Really it’s very useful for us.

And also he taught different types of project assigned by the management and also how to use and implement it.

Mr. Vincy Joseph gave a wonderful session on how to brand oneself during interview. She gave lot of questions to prepare for the interview and how to present our self.

This program gave more importance for the student and also we will assure that we practice these day to day life. Again our thanks to MR. Kannan Narasimhan & Mrs. Vincy for this program and giving insights.
The session was very interactive and very useful to all of us. Mr. Kannan explained the basic concepts of the project and learn work by means of simple realistic games. From the ball game & rope game we understood the concepts of leadership roles, team management skills and effective planning. 
In the morning session, the lecture by Mr. Kannan Narasihan was outstanding. From his lecture we had got a clear knowledge and information about the software projects.
Being an engineering student, I had many doubts related to software project lifecycle. But after the session I could get a complete idea about it. He explained all the concepts with real time examples such as project with movies and marriage and risk management with cricket match in a rainy day. This helped us in easy understanding. Those things were simply amazing and his way of giving inputs to us were remarkable.
Also his “Points to ponder” and way of reaction after a successful and failure projects were very useful.
Mrs. Vincy Joseph took us a class on interview skills. 1-2-3 technique and sandwich technique were good ideas, which would help in my forthcoming interviews. Primarily, I felt this also as a useful session and I will take these things for my project as well as career development.
Also we the students of PEC-CSE who have attended the program has formed a Presentation from our learning’s and had decided to present on to our classmates on tomorrow.
For sure, we will make our full effort to enlighten ourselves and sure we will pass these inputs given to us to our friends so that we spread our knowledge on “Software Project Management” and “Branding In Interview” to them so that others could enlighten themselves.
And I thank Our Director-Placement & Training to arrange this program.
Project Basics:
Syed Faizan – PEC – Final MCA

I am Syed Faizan studying Final MCA. Though I am from computer stream, I am struggling to prepare my final year project.

I thought that I need to go in plant training to know what people doing in the project phase. But, I am lucky that I got it from the hands of an experienced Industry person, Mr. Kannan – in my college itself.

My college gave me an opportunity to learn what project management is. Without spending money and going out, I learnt the project management basics. Now, I am strong enough to do final year project and as well as a company project.

Mr. Kannan Narasimhan taught the project management with example which helps me to remember the bullet points very easily.
Even though I have undergone the soft skills training program, I have not get such a confidence to talk in front of such a crowd. But, when I undergone this program, I was inspired by Mrs. Vincy Joseph and Mr. Kannan Narasimhan. Their attitude and body language inspired me and made me to speak out.
