PAAVAI ENGINEERING COLLEGE (Autonomous) DEPARTMENT OF CHEMISTRY

Faculty Development Programme on “**Emerging trends in the development of material characterization**”

A One day Faculty Development Programme (FDP) on “**Emerging trends in the development of material characterization**” was conducted by department of chemistry, Paavai Engineering College on 05.01.2018 at Cute Hall, Paavai Engineering College. Dr.G.Raja, Head of the Department of chemistry, Paavai Engineering College was the resource person. On the whole, this FDP programme was beneficial to all the faculty members of Chemistry belong to Paavai Institutions. Dr.K.Selvi, Dean Academics, welcomes the gathering and suggested the faculty members to make use of the opportunity to develop their knowledge in new topics.

From this programme, the faculty members learnt the basic concepts of materials and its applications. Nowadays, this method is time-consuming and laborious; it often takes ten to twenty years from design, development, experiment, optimization, and characterization to integration, application, and first time put into the market, which is difficult to meet the needs of the rapid development of industry for new materials. With the development of economy and science and technology, designing materials on demand and accurately controlling materials’ properties have become the development trends of advanced materials have been discussed. The session ended up with doubts and questions by our staffs their doubts. R.Gayathri, AP/Chemistry proposed the vote of thanks.

Finite Element Analysis

A two-day faculty development programme on “Finite Element Analysis” was held at Paavai Engineering College, from November 23rd and 24th, 2017. The FDP aims to provide opportunities to faculty members to enrich their teaching skill. The Programme also intends to develop the knowledge of participants for Finite Element Analysis in the relevant field for inculcating learning values in students and guiding and monitoring their progress.

Mr.P.N.Mohankumar, Assistant Professor, Department of Mechanical Engineering, Paavai Engineering College has delivered an interactive lecture on “Isoparametric Elements”. In this session participants learned the meaning, definition and derivation of shape functions and stiffness matrix of Isoparametric Elements. During the tutorial hours each one type of sample problems are solved and as well as assignments are given for more practices.

Mr.V.Elango, Assistant Professor, Department of Mechanical Engineering, Paavai Engineering College, conducted the session on “Axi-Symmetric Elements”. In this session, he explained the various classifications of Elements type, Related Derivations of Axi Symmetric Elements and Sample problems are solved. Assignments are given to the participants to their practices.

RAMKUMAR Faculty of Agriculture. The Principal, Paavai Engineering College, Presided over the function. In his presidential address, he emphasized the importance of this session and made the student enthusiastic to learn from the guest speaker. The chief guest started his session by saying about the traditional mechanical engineering; other engineering branches such as electronics, control engineering and physics play their specific role within the agricultural engineering field. She also said that Agricultural engineering has affected and stimulated major changes in agriculture. She explained about Mechanization and automation, structures and environment, labor and management, and energy and water. The knowledge and expertise generated in several agricultural and environmental engineering fields must be integrated with expertise of biological and socio-economic sciences. The re-design of production systems and their technology can help to achieve ecologically sound and economically viable agriculture and its acceptance in the community. The session ended up with doubts and questions by our students and the guest solved their doubts. Mrs. P. PAPITHA Faculty of Agriculture proposed the vote of thanks.

PROCESS SIMULATION AND ANALOGY IN CHEMICAL ENGINEERING

Paavai Engineering College (Autonomous), Department of Chemical Engineering organized One day national level workshop on Process Simulation and Analogy in Chemical Engineering, on 22-September-2017 at Kalam Chamber.

Dr.K.K.Ramasamy, Director-Administration, Paavai Institutions, presided over the inaugural function. Mr.G.Srinivasan, HOD, Department of Chemical Engineering, welcomed the director, Mr.NagulDev, Assistant Professor, Department of Chemical Engineering and gathering.

Mr.G.Srinivasan gave warm welcome to chief guest Dr.N.Anantharaman Professor & Dean Academic Programme, NIT Trichy, and Dr.UdayaBhaskar Reddy Ragula, Associate Professor, Amrita University.

The Dr.K.K.Ramasamy, in his presidential address, explained briefly about the concept of simulation and its importance in engineering applications.

The chief guests Dr.N.Anantharaman and Dr.UdayaBhaskar Reddy Ragula explained in details about concepts of process simulation and its applications in chemical engineering. Some of the points are given below.

A simulation is the execution of a model and is represented by a computer program that gives

information about the system being investigated. The simulation approach of analyzing a model is opposed to the analytical approach, where the method of analyzing the system is purely theoretical. As this approach is more reliable, the simulation approach gives more flexibility and convenience. The activities of the model consist of events, which are activated at certain points in time and in this way affect the overall state of the system. The points in time that an event is activated are randomized, so no input from outside the system is required. Events exist autonomously and they are discrete so between the executions of two events nothing happens. The SIMSCRIPT provides a process-based approach of writing a simulation program. With this approach, the components of the program consist of entities, which combine several related events into one process.

Modelling and simulation of system design trade off is good preparation for design and engineering decisions in real world jobs. The scenario described above is but one situation where computer simulation can be effectively used. In addition to its use as a tool to better understand and optimize performance and/or reliability of systems, simulation is also extensively used to verify the correctness of designs. Most if not all digital integrated circuits manufactured today are first extensively simulated before they are manufactured to identify and correct design errors. Simulation early in the design cycle is important because the cost to repair mistakes increases dramatically the later in the product life cycle that the error is detected. Another important application of simulation is in developing "virtual environments" e.g., for training. Analogous to the holodeck in the popular science-fiction television program Star Trek, simulations generate dynamic environments with which users can interact "as if they were really there." Such simulations are used extensively today to train military personnel for battlefield situations, at a fraction of the cost of running exercises involving real tanks, aircraft, etc.

Dear Principal, Dr.M.Premkumar of Paavai Engineering College (PECTN),

Apologies for resending the report, please note the updated category.

The D2S program of QEEE (Quality Enhancement in Engineering Education) strives to raise the bar of engineering education pan India through its intervention in Tier 2 and Tier 3 colleges. The program began in Jan 2014, and has offered about 150 courses over 6 semesters since then.

For the success of the program, it is essential that participant colleges are committed to the objectives of the program. Accordingly, we have rated the colleges on 3 parameters - attendance, interaction and performance. Based on the ratings, we have also placed the colleges in one of the following 5 categories

- **Partner**- Colleges that are in sync with the IITs on the program objectives
- **Committed** Colleges that are complying with the requirement, but have still not been able to integrate the program fully into their college
- **Non-Committed**- Colleges that acknowledge the usefulness of the program, but are struggling to incorporate it into their college
