Specialized in Anchor Faster Technology

We wish to introduce ourselves as manufacturers of high quality and heavy duty 'IOTEK ANCHOR FASTENERS' also commercially referred as grip expansion bolts or concrete expansion fasteners.

We are specialized in Anchor fastener technology for the last fifteen years, designing and manufacturing Anchor Fastener for the customer as per specification for allied applications.

- ① Anchors fasteners or grip expansion bolts can be used for wide application such as:-
- ② Fixing of Door frames, Window Frames against concrete column
- ③ Fixing lintel plates for casting beams, extension of beam and columns, grouting and strengthening of cracked beams or column and for all structural works.
- ④ To erect space frames for industrial sheds, petrol stations, amusement parks, grouting of machines , conveyer system, erection of elevators and lifts and other Industrial applications.
- ⑤ Used by Interior decorators for suspending false ceilings, chandeliers, wood paneling, plaster of Paris works etc.
- ⑥ It is also widely used for sanitary and plumbing works i.e., suspending pipe lines for multi storied buildings and complexes
- ⑦ For the structural changes in casting of beams or column for buildings, anchor fastener technology is cost effective and the right choice.
- ⑧ Apart from the above few applications of anchor fasteners, there is a wide usage for building and civil works. There is no more chipping, chiseling, re-work, breaking or sweat.' just Drill and Fix Iotek Anchor Fastener'.
- ⑨ We manufacture and supply wide range of Anchor fastener in different sizes from 6mm OD to 32mm OD as per specifications and our customers.

Method of Application in Concrete Area

- ④ Pull-Out Loads are For M200 Concrete.
 - ④ No reinforcements required in drilling holes.
 - ④ Factor of safety recommended for uniform load=4 for Shock load=8
 - ④ The all-round double expansion/ Sleeve Expansion provided by the two springs /Sleeve and upward movements of the bolts itself while tightening ensures perfect anchoring within a few turns of the nuts,
 - ④ OD of bolt/sleeve is same as that of hole in the fixture.
 - ④ Hence installation of machinery equipment and other such application is made easy.
 - ④ Drill and check the recommended Standard/ Quality of R.C.C before drilling & Installation.
 - ④ We undertake design and manufacture of heavy duty or special type Fasteners suitable for any related application
-
- Tighten the Nut after hammering the Anchor Fastener in to the drilled hole
 - The two springs slide down the parabolic curvature as the nut is tightened for perfect anchoring
 - Hammer the pin after inserting the Anchor fastener in the drilled hole
 - Grip tapered portion expands in the concrete area as Pin is hammered
 - Tighten the nut after hammering the anchor fastener in to the drilled hole and the whole length of the sleeve slides down on the parabolic curved bolt, till anchored perfectly

Respected Sir,

Sub: Requesting permission for Industrial Visit –Reg.

We are happy to inform you that our students of mechanical engineering are interested to visit your esteemed company. The chance of visit to your company will give an opportunity to the students to learn more about your organization. It will help our students in real time application in their studies. Our students are eager to visit your organization and get some industrial exposure.

So, kindly grant us permission to visit your company with our students on 16.02.2017. Looking forward for your positive reply.
