To

The Head KTMD,
CSIR-National Aerospace Laboratories (NAL)
HAL Airport Road,
Bangalore 560 017, India.

Dear Sir,

Sub: Student visit at NAL- Permission requested - Reg.

Paavai Engineering College is a premier Autonomous Educational Institute affiliated to Anna University, Chennai and located in Pachal, Namakkal district, Tamilnadu-637018. Our Institute had NAAC-Accredited with a CGPA 3.14 on a four point scale at 'A' Grade and recognized under section 2 (f) of the UGC Act, 1956. The AICTE- CII ranked the institution with "Platinum" status (2017-18) and received the prestigious award of "Most Innovative College Award-South Zone" organized by AICTE and Internshala at the AICTE Office, New Delhi

The Department of Aeronautical Engineering offers a four year undergraduate program (B.E) in Aeronautical Engineering from the year of 2015. The department has a team of highly qualified, dedicated and motivated faculty members who are graduated from reputed institutions. The department has generated better learning atmosphere through well-equipped laboratories and classrooms with multimedia facilities and a dedicated department library, in addition to Institute's central library.

We arrange regular industrial visits to our students to understand the real life applications of the aeronautical and allied subjects. Our students are planning to Visit your esteemed organization in the month of August, 2019 according to your convenient dates (positively on **19th August 2019**). Around 50 students are interested and they will be accompanied by 4 faculty Members.

In this regard, we request you to kindly grant permission for our students and staffs to visit your organization, we looking forward to your positive reply.

Thanking you,

PRINCIPAL

Pazhai Engineering College,
NAMAKKAL,
Tamil Nadu

Dear Sir/Madam,

Sub: Visit of BE (Aero) students on 19-08-19
Ref: Mail dt 02-08-2019

This is to certify that BE students and faculties from your Institution visited CSIR-National Aerospace Laboratories, Bangalore on 19-08-2019. They visited various facilities as per the programme enclosed and interacted with the scientists during their visit. The students had an interactive discussions and followed by visit to various divisions.

With kind regards,

(A. SOMANARAYANAN)

PANTECH

In 1998 with an objective of offering advanced technological solutions in the fields of Information Technology (IT) and Information Technology Enabled services (ITES). In July 2006, PANTECH became the first Private-Sector IT Park in Kerala. With the State-of-the-Art building of 55,000 sq. ft., sophisticated technical infrastructure and more than 400 professionals, PANTECH is now the front-line service provider in IT infrastructure services industry, catering to both domestic and international clients.

There are a host of services PANTECH offer including Software Development, Web Designing/Development, Domain Registration, Web Hosting, Server Administration(Windows/Linux), Voice Technical Support, Remote Server Administration, Server Co-location, Search Engine Optimization, Medical Transcription and E-Commerce solutions. Being a steadfastly growing organization, PANTECH is also creating employment potential in different spheres for a large pool of educated youth; both freshers and experienced professionals in the state of Kerala.

At PANTECH, we are striving to understand the changing customer needs and stay in-line with the increasing demands of the industry. By constantly upgrading the quality of our processes, we simply customize the technology readily usable to the clients. PANTECH is proud of our solid team of Information Systems professionals, including those trained abroad, who study, design, develop, enhance, customize, implement, maintain and support various aspects of IT products and services. For all the overseas business ventures, especially the North American clients, we work in close association with our business partner, M/S PANTECH Software Solutions Inc., New York, USA.

Mission

We are committed towards providing ever-increasing level of customer satisfaction by offering the highest quality in; Software and Web development, IT enabled services, HBPO services, E-Commerce solutions, Search Engine Optimization and Web Application services.

Vision

Being a global brand, to make a difference in client perception about service quality.

COMPANY DETAILS

Aspire Communications:

ASPIRE PR & Strategies Pvt. Ltd., leading in forte communications and empirical network is Pune's leading Public Relations agencies today. Established in 2004, with over a decade in business, we provide services like Public Relations, Digital Social Media, Corporate Social Responsibility Consulting, Image Consulting, Celebrity Management, Movie Promotions and Media Relations. We at ASPIRE PR & Strategies Pvt. Ltd. cater to business verticals like retail, health care, hospitality, IT, education, banks, real estate, infrastructure organizations, governments, semi - government organizations, non - profit organizations that form the rich clientele list. We obligate to our clients for deliberate communications assignments, endorsing the agency's reputation as one of Pune's leading forte communications firms.

Pune, where our head office is situated is an emerging city and a dynamic expanse profuse with prospective. To recognize, communicate and connect with its multi-cultural and multi-lingual audience can be pretty much formidable until you get in touch with us at ASPIRE PR & Strategies Pvt. Ltd., we have a native and immaculate comprehension of the city, its inclinations and requirements. Fortified by a unified cohesive network and solid associations with the chief influencers and cross-media platforms, ASPIRE PR & Strategies Pvt. Ltd. can best deliver Pune across Pune and our other branches at Nagpur, Nasik, Aurangabad, Kolhapur.

Confronted with a traditionally assorted audience with random demographics, you need a singular entity that can go beyond generalizations to work in the restraints and nuances that makes strategies and approaches precise for a result-oriented response from your target audience.

A multi-national corporate giant, an upcoming cultural icon, an energetic start-up, a visiting sports team a pan-regional notion campaign - every client needs us to talk to different audiences. ASPIRE PR & Strategies Pvt. Ltd. services are varied tools, incorporated by a particular emphasis on your specific requirements to create a unique strategy. At ASPIRE PR & Strategies Pvt. Ltd., we consider that Public Relations is a superlative technique to create awareness about your own company and that to strengthen its reputation.

Thus our key focus areas are

- Educating the masses/ building awareness
- Image building
- All features of peripheral and internal communications
- Editorial and media relation campaign including press conference, press release, interviews, syndicated articles
- Brand Building through media, non-media events, through product introductions, conference, workshops, product profiling

OUR FORTES

- A comprehensive understanding of the industry and aptitude to endorse inventive, cost-effective approaches
- Media sustenance owed to close rapports with them across the country
- Prompt resorts
- Aptitude and assurance to meet targets
- Countrywide reach through a network of acquaintances

OUR SERVICES

Media Relations

- Organise Press Conference
- Press release dissemination
- One on one interview
- Select Press brief

Corporate Management

- HR related features/stories
- Newly introduced products/services
- Appointments /recruitments among the leadership team of the company
- MoU announcement /Acquisitions/Brand building

Brand Management

- Product launch
- Name change
- Logo change

Celebrity Management

- His or her image building
- Pre event publicity
- Post event publicity

Investor Relations

- Financial Results
- Analysts meeting
- Conference call

Crisis Management

- Handling media and take proactive measures
- Act as a communication bridge between client and media

Media Tracking

- Tracking news & views in print and electronic media
- Message mapping and timely response strategy
- Customised information services for competitive tracking

Leadership Profile

- Positioning CTO, CIO and President as authorities in high profile expert panels in the media and creating relevant media platforms
- Familiarizing the media across Pune
- Relationship-building interviews and leveraging quotes for industry articles.

The Assistant Professor,
EEE Department
Paavai Engineering College,
Narasikallu

Dear Sir,

Greetings from Wonderla, Kochi!

As per the communication from your end, we are glad to permit industrial visit for the Third year EEE students of your college on 20.12.2017 at Wonderla, Kochi. The time for industrial visit (Virtual Reality) will be intimated to you after reaching the park.

As the industrial visit takes place inside the park, the purchase of entry tickets is compulsory. Please contact Help Desk with your booking number, on the day of visit for further proceedings.

Please intimate us in advance if there is any change in your schedules.

For any further assistance, please feel free to contact us.

Thank you

INTERNSHALA TRAININGS

CERTIFICATE OF TRAINING

Ethical Hacking

Vignesh J from **Paavai Engineering College(Autonomous)** has successfully undergone a six weeks online summer training on Ethical Hacking. In the training, Vignesh learned Basics of Information Security, Computer Networking and Web Development, Information Gathering and VAPT of some important vulnerabilities in the OWASP top 10, Automating VAPT, and Documenting and Reporting Vulnerabilities. The training lasted for six weeks from 1st June, 2019 to 13th July, 2019.

In the final assessment of the completion of the training program, Vignesh scored 44% marks.
We wish Vignesh all the best for future endeavours.

Dear Sir,

Greetings from Wonderla, Kochi !

As per the mail from your end, we are glad to permit industrial visit for the 2nd^{year} Food Technology and **Pharmaceutical Technology** students on 11.08.2019. The time for industrial visit will be intimated to you after reaching the park.

As the industrial visit takes place inside the park, the purchase of entry tickets is compulsory. Please contact Help Desk with your booking number, on the day of visit for further proceedings.
Please intimate us in advance if there is any change in your schedules.

For any further assistance, please feel free to contact us.

Regards,

INTERNSHIP CERTIFICATE

This is to certify that **U.SHARATH KUMAR (18501036)**, from **Paavai engineering college, Pachal-637018, MBA** first year, has successfully completed his internship programme from **12/06/2019 to 28/06/2019** under the guidance of our establishment. His character and conduct was found to be good, during the above period.

DATE: 28/06/2019

PLACE: Andagalur.

TO WHOM IT MAY CONCERN

This is to certify that **SUVETHA.K (Reg.No.18501037)** MBA student of **Paavai Engineering College, Namakkal**. Had undergone internship work in this organization for the period from **(10.06.2019 to 10.07.2019)** and completed the training successfully. During the period her performance was good.

Thanking You,

For **PODARAN FOODS INDIA PRIVATE LIMITED**

**STUDY ON LUNAR MARE ORIENTALE'S IL'IN CRATER USING EMPIRICAL
REMOTE SENSING AND FUZZY LOGIC TECHNIQUES: A CASE STUDY OF
PLANETARY EXPLORATION.**

ABSTRACT

For exploring the planetary bodies and associated are being used to study through the remote sensing along with some principles and applications. In this project we use Remote sensing technique for planetary exploration. Remote sensing is a technique to study information about an object or phenomenon without a physical contact with an object. The advantages of the remote sensing. It is used to collect data very easy as variety of bands for space exploration. The purpose of remote sensing for mineral exploration, lithological mapping, surficial deposit, structural mapping, environmental geology, event mapping and monitoring, planetary mapping etc., In the present study, the PCA and Fuzzy logic methods have been used to study the surface characters and their depositions of the Mare Orientale Basin of Il'in crater in the lunar region, it was first fully described by the German Astronomer Julius Franz (The Moon) in 1906, and has named the mare as "Eastern sea", it is a multi-ringed crater, the inner and outer Montes Rook and the outermost ring are the Montes located on the western border of the Cordillera, it is located near side and far side of the moon with coordinates of 19.4°S 92.8°W, mapping of crater such as diameter, area, composition, depth of the basin, it resembles as target ring bulls eye. The main purpose of the study is to monitor and gather information of receiving data from range of surface materials by the method of Principal component analysis and band ratio the satellite images for the clear view of surface materials, it has done by image processing of PCA in Envi and the output band ratio images classified using fuzzy logic method for range of surface materials by matlab.

Keywords or phrases: Remote sensing, Il'in crater, Principal component Analysis, surface materials, Mare Orientale basin, fuzzy logic.

1. INTRODUCTION

Mare orientale basin is one of the remarkable feature basin compared to the other basins on the Moon. The German Astronomer Julius Franz who named the mare as eastern sea. It is located in the Moon's southwestern limb between boundary of far and nearside, left-hand edge as seen from the Earth and superlative example for the preserved "multi-ring basin" on the Moon. In this lunar surface the basin is fairly flooded with the mare deposits. The lunar has formed basins like Orientale which plays an important in the early history of moon. Since they were extremely disruptive, has confronted altering events that caused substantial fracturing, melting and end formation of mare deposits in the crust. In base of topography analysis should be followed as in part of determine characteristics such as dimensions of the basin, with multi ring formation of crater. The Orientale basin has 930 km in a diameter and covers an area of 700, 0000 km² [Head 1974; Whitten *et al.*, 2011], the earlier studies says that the thickness of the mare was less than 1– 2 km [Head 1974; Solomon and Head 1980] and [Greeley, (1976) and Scott *et al.*, (1977)] highlighted that the mare thickness could be up to 1km. The recent LRO wide-angle Camera (LROC), the depth of the Maander crater situated in the Mare Orientale is estimated as 6.04 km. Orientale consists of five mare ponds, the largest of which covers an area of 8,890 km² and the smallest of which is 145 km. The North lengthened flat extent is a Lacus Veris it is also known as spring lake. The Researchers examined that this orientale basin is formed due to impact of meteorite about 3.8 billion years. The properties are compositional variation of surface materials to study about the characteristics of the surface materials present in the Il'in crater filled with mare, the large impact events produce copious volumes of shock melted, liquid rock, most of which lines of transient crater and floor deposit of the crater and through these study will able to study in which form we will get the input [Howard and Wilshire, (1975); Grieve *et al.*, (1977); Cintala and Grieve, (1998)]. Through image processing we can identify the types of minerals in the lunar crater by using Matlab and Envi. In connection with that, the present study is aiming to investigate from the M³ satellite image the topography characters of the basin (depth, diameter, and area).

2. Study Area

The study area is Mare Orientale basin it is one of the oldest basin formed in lunar surface due to impact of meteorite. By this impact the events produce as shock melted, liquid rock, floor deposit of the crater and collision caused ripples in the crust, which results in the formation of circular Multi Ring features it resembles as a target ring bulls eye, they are inner and outer Montes Rook and the outermost ring is Montes Cordillera. The early studies says that it is an Moon's most impact basin. However, it is younger than Imbirium basin. The Multi ring features are showing that the mostly reliable rough mountain ranges with mare deposits, through this impact the Il'in crater is formed. The Il'in crater is a circular and bowl shaped crater, it is located on the far side of the moon, it lies in the western half of Mare Orientale basin, in the central of the basin the lava is flooded with lunar mare, the Il'in crater is larger than crater Hohmann. By image processing we can identify the types of compositional variations and their relevant surface characteristics in lunar crater by using Matlab and Envi. The location map of Il'in crater is shown in Fig 2.1.

Fig 2.1. Original Picture of the Il'in crater on the far side of the moon by LRO

3. Materials and Methodology

3.1 Materials

The Moon Mineralogy Mapper (M^3) is one of the instrument from the 11 payloads in Chandrayaan-1, it is contributed to the India's first mission to moon launched on October 22, 2008 at Sriharikota on board of ISRO for a two year mission of 100km polar orbit. The M^3 with high resolution compositional maps will help in understanding the early evolution of the lunar surface. The M^3 is to characterize and map lunar surface mineralogy of lunar geologic evolution. It helps in understanding the highland crust, basaltic volcanism, impact craters. The M^3 is a high pushbroom imaging spectrometer operates in a range of 0.7 to 3.0 μm . The goal is to translate the accurate measurement of absorption features of rocks and minerals. The M^3 measurements are obtained for 640 spatial elements and 261 spectral elements. This translates to 70 m/pixel spatial resolution and 10nm spectral resolution from a nominal 100 km polar orbit for Chandrayaan-1, the field of view is 40 km in order to allow contiguous orbit-to-orbit measurements at the equator that will minimize the condition of lightning. The spectral range 0.7 to 2.6 μm capture the absorption bands for the most important lunar minerals. By the study of [Pieters *et al.*, (2009)] the M^3 operates from the visible into the near- infrared of 0.42- 3.0 μm where highly diagnostic mineral absorption band occurs. The M^3 has 85 contiguous bands, in the present study the satellite image of Il'in crater from M^3 data consist of 73 bands, for studying the compositional variations of surface characters the method used is Principal Component Analysis for the bands which consist of clear view of surface characters is done with Envi software and to implement the range of surface characters for the computed bands with set of rules by if-then logic through fuzzy logic method is done by Matlab software.

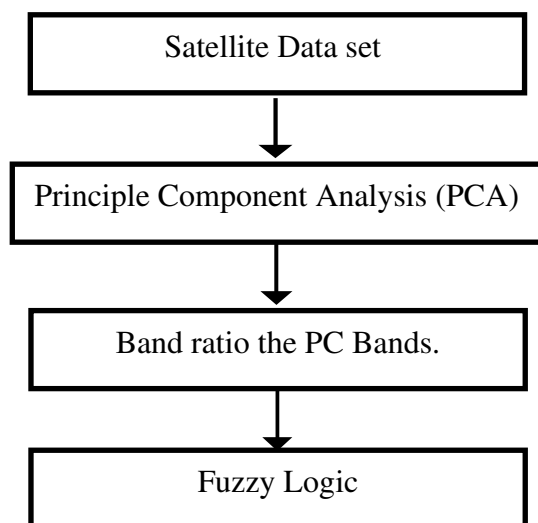

Fig3.1. Original Band Image

Fig3.2. PCA plot for 73 bands

3.2 Methodology

3.2.1 Principal Component Analysis (PCA)

The Principal Component Analysis is a method that converts original data into new set of data to capture the essential information. It is a linear transformation that converts multiband images to new set of image bands. In Envi the input image is computed to covariance or correlation matrix depends on the data processed, then the eigen vectors of the covariance or correlation matrix is calculated [Rodarmal and shan., (2002)]. In this study the satellite image consists of 73 bands, this data processed with PCA for 73 spectral bands and the PCA converted bands were band ratioed until the view of clear surface materials, the surface materials were clearly visible for 1-5 bands, from these bands it is computed as band ratio for 9 combinations the images were displayed for 9 combinations with RGB in the PCA band ratio images, the band ratio combinations are band 123, band 312, band 231, band 234, band 423, band 342, band 345, band 534 and band 453. The surface materials in red is poor in titanium, green is sensitive to iron, blue is rich in titanium as per the study of [Shkuratov et al,2003]. The band ratio combination did in this study based on this similar works of [Rodarmel and Shan, (2002), R.P. Gupta et al., (2013), Mia and Fujimitsu, (2012)].

The image classified based on the Band ratios with RGB is given below

For 123,

$R = \text{Band2}/\text{Band 1}; G = \text{Band3}/\text{Band2}; B = \text{Band1}/\text{Band3}.$

For 312,

$R = \text{Band1}/\text{Band3}; G = \text{Band2}/\text{Band1}; B = \text{Band3}/\text{Band2}.$

For 231,

$R = \text{Band3}/\text{Band2}; G = \text{Band1}/\text{Band3}; B = \text{Band2}/\text{Band1}.$

For 234,

$R = \text{Band3}/\text{Band2}; G = \text{Band4}/\text{Band3}; B = \text{Band2}/\text{Band4}.$

For 423,

$R = \text{Band2}/\text{Band4}; G = \text{Band3}/\text{Band2}; B = \text{Band4}/\text{Band3}.$

For 342,

$R = \text{Band4}/\text{Band3}; G = \text{Band2}/\text{Band4}; B = \text{Band3}/\text{Band2}.$

For 345,

$R = \text{Band4}/\text{Band3}; G = \text{Band5}/\text{Band4}; B = \text{Band3}/\text{Band5}.$

For 534,

$R = \text{Band3}/\text{Band5}; G = \text{Band4}/\text{Band3}; B = \text{Band5}/\text{Band4}.$

For 453,

$R = \text{Band5}/\text{Band4}; G = \text{Band3}/\text{Band5}; B = \text{Band4}/\text{Band3}.$

3.2.2 FUZZY LOGIC:

The Fuzzy logic is to set rules for to implement the fuzzy set for the classified image. It is a set without a crisp and clearly defined boundaries, the elements contain in the fuzzy set is only with partial degree of membership. The fuzzy logic is a reasoning for generalizing yes or no as Boolean logic, if we give true the numerical value will be 1 or if we give false the numerical value be 0. In Matlab the fuzzy logic toolbox is a best method to solve the problem which allows using logic of if- then rules for systems's behaviour. This Toolbox is an execution of functions built on this software, it is used for numeric computing environment and provides tools for creating and editing fuzzy inference systems by using

Matlab. There are two types of systems in fuzzy logic as follows Fuzzy Interface System and Adaptive Neuro fuzzy Interface system. In this present study we use Fuzzy Interface System. The PCA Bands of 9 combinations were divided and classified into 3 input variables named as red, green and blue, the output is named as surface materials the input and output display range is [0, 255] using Mamdani method, this process is done by method of [Vini, Aakanksha, Aditi, Ambika and Ankita, 2013]. The similar works of this method [Jabari and Zhang, 2013, Afirah and Sharifah, 2016, Barrile and Bilotta, 2008].

FIS Properties: There were three input variables named as red, green, blue. For the each input variables the properties to be classified into 1st, 2nd and 3rd combinations and the output variable will be the range of surface materials for classified band ratio images of PCA bands.

Member Functions: There will be 3 member functions for each input variables it will be classified for the band ratio of 9 combinations using fuzzy logic. The first combination for each input variables are red, green and blue, their member functions for each input variable is given as Band 123, Band 312, Band 231. The second combination of input variables for red, green, blue, their member function for each input variable is given as band 234, band 423, band 342 and the third combination for each input variables of red, green, blue, their member function for each input variables is given as band 345, band 534, band 453 and for all three input variable combinations the output is named as surface materials (i.e. it is the accuracy assessment of band ratio images) its member function is given as Minimum, Medium and Maximum as triangular form.

The parameter range of output variable,
Maximum= [175 215 255];
Medium= [75 125 175];
Minimum= [0 35 75].

For example, the fuzzy set rules based on if- then logic,
If Band 123 in red **then** it is low in titanium,
If Band 312 in green **then** it is sensitive to iron,
If Band 231 in blue **then** it is high in titanium,

For the output of maximum range of surface materials the 3 combinations with input variables with band ratios are given as

For 1st combination of maximum;

Red= Band 123; Green= Band 312; Blue= Band 231

For 2nd combination of maximum;

Red= Band 234; Green= Band 423; Blue= Band 342

For 3rd combination of maximum;

Red= Band 345; Green= Band 534; Blue= Band 453.

For the output of medium range of surface materials the 3 combinations with input variables with band ratios are given as

For 1st combination of medium;

Red= Band 312; Green= Band 123; Blue= Band 231.

For 2nd combination of medium;

Red= Band 423; Green= Band 234; Blue= Band 342

For 3rd combination of medium;

Red= Band 534; Green= Band 345; Blue= Band 453.

For the output of minimum range of surface materials the 3 combinations with input variables with band ratios are given as

For 1st combination of minimum;

Red= Band 231; Green= Band 312; Blue= Band 123.

For 2nd combination of minimum;

Red= Band 342; Green= Band 423; Blue= Band 234.

For 3rd combination of minimum;

Red= Band 453; Green= Band 534; Blue= Band 345.

Table 3.1 Input parameters

4. Results and Discussion

4.1 PCA Results

From the method of Principle Component Analysis(PCA), the satellite image bands

consist of 73 bands were evaluated into PCA bands, the surface characters is clearly visible for 1-5 bands, it is classified into 9 combinations with RGB image such as band 123, 312, 231, 234, 423, 342, 345, 534, 453 is given below from (Fig.4.1- Fig.4.9.) and for the accurate assessment of surface characters the 9 combinations were band ratioed with the PCA Bands and classified as a RGB images is given below from (Fig 4.10.- Fig 4.18.), the compositional variations describes as the Red surface represents it is low in titanium or high in glass content, the green surface represents it is sensitive to iron, the blue surface represents high in titanium, some of the similar works based on this study [Shkuratov et al., 2003, Lucey et al., 1998, 2000a]. Based on [Shkuratov et al., 2003] the surface materials were described, in the early study of [Lucey et al, 1998] the surface materials range and types of minerals were studied in this work.

4.2 Fuzzy Logic Results:

The fuzzy logic is a concept of reasoning with the logic of if- then rules based on the system behaviour, the fuzzy logic is to set rules for the classified images of 9 combinations band ratio PCA Bands, then the 9 combinations of band ratio PCA Bands were divided into 3 sets of combination for to satisfy the rules is set to do the fuzzy logic using mamdani method by triangular member function, the input variables were Red, Green and Blue and the member functions which describes the surface characters of each classified band ratio images as a 3 set of combinations such as the 1st combinations are 123, 312, 231, the 2nd combinations are 234, 423, 342 and the 3rd combinations are 345, 534, 453, the output variable is a range of surface materials and their member function such as minimum, medium and maximum, the rules set for the execution of fuzzy logic is in (Table 3.3). The rules set for fuzzy sets with if- then logic is given below:

For the maximum range of output the results of the fuzzy set rules for Maximum range of surface materials shown in (Fig 4.19.).

The rules for the **first** combination of band ratio images were set as

If the Band123 in red **then** it is low in titanium or high glass content,

If band 312 in green **then** it is sensitive in iron,

If Band 231 in blue **then** it is high in titanium.

The rules for the **second** combination of band ratio images were set as

If band 234 in red **then** it low in titanium or high glass content,

If band423 in green **then** it is sensitive to iron

If band 342 in blue **then** it is low in titanium.

The rules for the **third** combination of band ratio images were set as

If band 345 in red **then** it is low in titanium or high glass content,

If band 534 in green **then** it is sensitive to iron,

If band 453 in blue **then** it is high in titanium.

For the Medium range of output the results of the fuzzy set rules for Medium range of surface materials shown in (Fig 4.20.)

The rules for the **first** combination of band ratio images were set as

If band 312 in red **then** it is low in titanium,

If band123 in green **then** it is sensitive to iron,

If band 231 in blue then it is high in titanium,

The rules for the **second** combination of band ratio images were set as

If band 423 in red **then** it low in titanium or high glass content,

If band 234 in green **then** it is sensitive to iron

If band 342 in blue **then** it is low in titanium.

The rules for the **third** combination of band ratio images were set as

If band 534 in red **then** it is low in titanium or high glass content,

If band 345 in green **then** it is sensitive to iron,

If band 453 in blue **then** it is high in titanium.

For the Minimum range of output the results of the fuzzy set rules for Minimum range of surface materials shown in (Fig 4.21.)

The rules for the **first** combination of band ratio images were set as

If band 231 in red **then** it is low in titanium,

If band 312 in green **then** it is sensitive to iron,

If band 123 in blue then it is high in titanium,

The rules for the **second** combination of band ratio images were set as

If band 342 in red **then** it low in titanium or high glass content,

If band 423 in green **then** it is sensitive to iron

If band 234 in blue **then** it is low in titanium.

The rules for the **third** combination of band ratio images were set as

If band 43 in red **then** it is low in titanium or high glass content,

If band 534 in green **then** it is sensitive to iron,

If band 345 in blue **then** it is high in titanium.

This method is done by [Vini, Aakanksha, Aditi, Ambika and Ankita, 2013], from these set of rules the band ratio of PCA band images were classified by if- then logic through fuzzy logic using Matlab. The similar work of this method, the way of setting the rules with if- then logic by [Ruby Bharti and Jitendra Kurmi, 2017].

4.1.1 PCA Image Analysis

The PCA bands of 9 combination as RGB classified images given below,

Fig 4.1. PCA 1 RGB combination of 123. Fig 4.2. PCA 2 RGB combination of 312.

Fig 4.3. PCA 3 RGB combination of 231. Fig 4.4. PCA 4 RGB combination of 234.

Fig 4.5. PCA 5 RGB combination of 423. Fig 4.6. PCA 6 RGB combination of 342.

Fig 4.7. PCA 7 RGB combination of 345 Fig 4.8. PCA 8 RGB combination of 534

Fig 4.9. PCA 9 RGB combination of 453

4.1.2 Band Ratio PCA bands image analysis

The 9 combination of PCA band ratios with RGB classified images are given below,

Fig 4.10. Band Ratio image for 123

Fig 4.11. Band Ratio image for 312

Fig 4.12. Band Ratio image for 231

Fig 4.13. Band ratio image for 234

Fig 4.14. Band ratio image for 423

Fig 4.15. Band ratio image for 342

Fig 4.16. Band ratio image for 345

Fig 4.17. Band ratio image for 534

Fig 4.18. Band ratio image for 453

4.2.1 Results of Fuzzy Logic Rules:

The output results of fuzzy set rules based on if then logic is given below,

Output for Maximum:

Fig 4.19. Fuzzy Logic rules this output for Maximum for 1st combination of band 123 in red, band 231 in green, band 312 in blue and for 2nd combination of band 234 in red, band 342 in green, band 423 in blue and for the 3rd combination of band 345 in red, band 453 in green, band 534 in blue.

Output for Medium:

Fig 4.20. Fuzzy Logic this output is for Medium for 1st combination Band 312 in red, band 123 in green, band 231 in blue and for 2nd combination Band 423 in red, Band 234 in green,

Band 342 in blue and for 3rd combination Band 534, Band 345, Band 453.

Output for minimum:

Fig 4.21. Fuzzy Logic rules this output is for minimum for 1st combination of Band 231 in red, Band 312 in green, Band 123 in blue and for the 2nd combination band 342 in red, band 423 in green, band 234 in blue and for the 3rd combination band 453 in red, and 534 in green, band 345 in blue.

5. Conclusion:

In the present study, the M³ high resolution satellite image has been used to study the surface characters and their materials of the Orientale's Il'in crater. In addition to that, the empirical technique of PCA bands has been processed for clearly to visualize the surface characters of the crater through the band combinations of 123, 312, 231, 234, 423, 342, 345, 534, 453. Moreover, the Band ratio of PCA bands enhances the conceivable and ample vision to observe the characters of the surface in an accurate range. At finally the fuzzy logic method was adopted to highlight the perfect band combination that could be shown the agreeable presence of the surface characters and features. The rules has been set with the logic of if- then for the range of surface materials from the 3 sets of band ratio combinations, the images were classified based on fuzzy set rules. The compositional variations of surface materials describes as the Red is low in titanium or high in glass content, the green shows it

is sensitive to iron and the blue shows it is high in titanium.

IN-PLANT TRAINING CERTIFICATE

This is to inform that **Mr.ABISHEK.R.**, 1st year B.E., Electronics & Communication Engineering student of **Paavai Engineering College, Namakkal**, has attended In-Plant training in our organization from May 28th 2018 to June 02nd 2018.

During this In-Plant training, he has learned the overview concepts of **ANDROID APP DEVELOPMENT**.

Thanking You.

TO WHOM SO EVER IT MAY CONCERN

This is to certify that Mr. G. SUDAARSAN (Reg. No : 17105122), S/O Mr. R. T. Ondiveeraswami, Third Year BE (ECE) student from Paavai Engineering College, Nainakkal has successfully completed 2 weeks of IPT with our company from 21st November 2019 to 5th December 2019. During this period, Introduction to Verilog HDL Language and basics of Digital electronics specifically on combinational Logic design and Sequential Logic design concepts were covered. During this training, he performed very well and has gained the practical knowledge of implementation using Verilog code.

Team MSPAND wishes him very best in his future endeavors.
