In the previous academic year 2022-2023 even semester, BM19653 –QUALITY CONTROL IN BIOMEDICAL ENGINEERING was identified as result pulling subject and we have plan to conduct remedial class to the slow learners for this subject. Slow learners are identified by the student's performance in previous CIA Marks, activities and those students identified/verified by head of the department. Similarly, students having backlogs in their previous end semester examinations can be also considered as slow learners. Remedial class schedule will be announced and attendance of these students for the class work will be monitored.

The following **Final year students** are asked to attend the remedial class without fail, Attendance is compulsory.

As per the previous year odd semester, result pulling subject of CM20503 – Chemical Engineering Thermodynamics, we have planned to conduct remedial class to the slow learners of this subject in current semester for the Academic year 2021 -2022 odd semester. Also the slow learners were identified by their result published from their previous End semester examinations. For the revision of all topics of ongoing subjects, Special coaching class will be conducted after the college hours for those students. Student's counselors will be taking special care on their respective students. The schedules of coaching classes will be announced and attendance will be monitored. The attendance of students for their respective Classes were monitored. The following students are asked to attend the class without fail on the previous day evening of the scheduled commencement of Continuous Internal Assessment test in their corresponding subject. Attendance is must.

The graph shows in the subject CM20503 – Chemical Engineering Thermodynamics by conducted remedial classes for the slow learners before each Continuous Internal Assessment test, the pass percentage (%) was increased. To improve the result of end semester exam the remedial class was conducted and achieved the target. So that pass percentage increase as compared to previous semester. Thus the result increased from 95 % to 100 % in the particular subject.

Remedial Class Analysis Graph

The slow learners were observed that the improvement in performance of periodical Continuous Internal Assessment tests. The graph drawn below, based on the remedial classes and timely analysis.

The graph shows in the **ME20403-Kinematics of Machinery** by conducting remedial classes for the slow learners before each Continuous Internal Assessment test, the pass percentage (%) of the students got increased.

Thus the pass percentage of the particular subject is (89.47%) when compared to the previous academic year (77.14%).

Coaching Class Report

Date: 11.04.2023

The coaching class for the students who scored less than 50% of mark and absentees in the Continuous Assessment I in the course BM20401-ANALOG AND DIGITAL INTEGRATED CIRCUITS equations have been conducted as per the coaching schedule. After completion of the coaching class, it is notice that the students that some students shown the considerable performance increase in Continuous Internal Assessment I result publish, have also shown the considerable performance increase in Continuous Internal Assessment II (CIA II). The rich effectiveness of conducting the coaching class is inferred as a whole for test result. Here with the coaching class comparison report is enclosed.

Date: 5.04.2023

The coaching class for the students who scored less than 50% of mark in the Continuous Assessment I in the course IT20601- Mobile Computing has been conducted as per the coaching schedule. After completion of the coaching class, it is notice that the students that some students shown the considerable performance increase in Continuous Internal Assessment I result publish, have also shown the considerable performance increase in Continuous Internal Assessment II (CIA II). The rich effectiveness of conducting the coaching class is inferred for test result. Here with the coaching class comparison report is enclosed.
